

Herculano

GRUPO FERPINTA

CHARACTERISTICS

- Removable sidewalls for greater equipment versatility;
- Fully metallic structure, more robust and lasting;
- Beater immobilizer system (mechanical moving floor);
- 4 vertical beaters for more consistent and precise spreading;
- PTO - 540rpm;
- Support leg (fuse at the drawbar);
- Moving floor with adjustable speed (mechanic or hydraulic control);

MUCK SPREADERS

H4R

Intended for smaller farms, this range of spreaders with 4 vertical beaters ensures a consistent and precise distribution of solid manure.

Its structure is developed in order to enable the passage to areas of difficult access and it quickly articulates with a tractor with less power (lower dimensions and weight).

INCREASINGLY VERSATILE...

For any equipment, we have several options available with which you can equip your standard product. In the case of the H4R, we highlight the hydraulic rear door, the rear spreading locator and the hydraulically adjustable drawbar.
